

**Mighty™ Chocolate Cherry Chinese Astilbe**  
*Astilbe chinensis 'Mighty Chocolate Cherry'*

Plant Height: 3 feet

Flower Height: 4 feet

Spread: 30 inches

Spacing: 24 inches

Sunlight: ● ●

Hardiness Zone: 2

Other Names: False Spirea

**Description:**

Showy, velvety, upright, cherry red flower spikes over divided, dark green and chocolate brown to reddish foliage; perfect in a shady spot with dappled light; prefers moisture so water regularly for abundant flowers and nice foliage

**Ornamental Features**

Mighty Chocolate Cherry Chinese Astilbe has masses of beautiful plumes of cherry red flowers at the ends of the stems from mid to late summer, which are most effective when planted in groupings. The flowers are excellent for cutting. Its attractive ferny compound leaves remain green in color with showy brown variegation and tinges of red throughout the season. The dark red stems can be quite attractive.

**Landscape Attributes**

Mighty Chocolate Cherry Chinese Astilbe is an herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Mighty Chocolate Cherry Chinese Astilbe is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

### **Planting & Growing**

Mighty Chocolate Cherry Chinese Astilbe will grow to be about 3 feet tall at maturity extending to 4 feet tall with the flowers, with a spread of 30 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 24 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in partial shade to shade. It requires an evenly moist well-drained soil for optimal growth. It is very fussy about its soil conditions and must have rich, acidic soils to ensure success, and is subject to chlorosis (yellowing) of the foliage in alkaline soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Mighty Chocolate Cherry Chinese Astilbe is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
